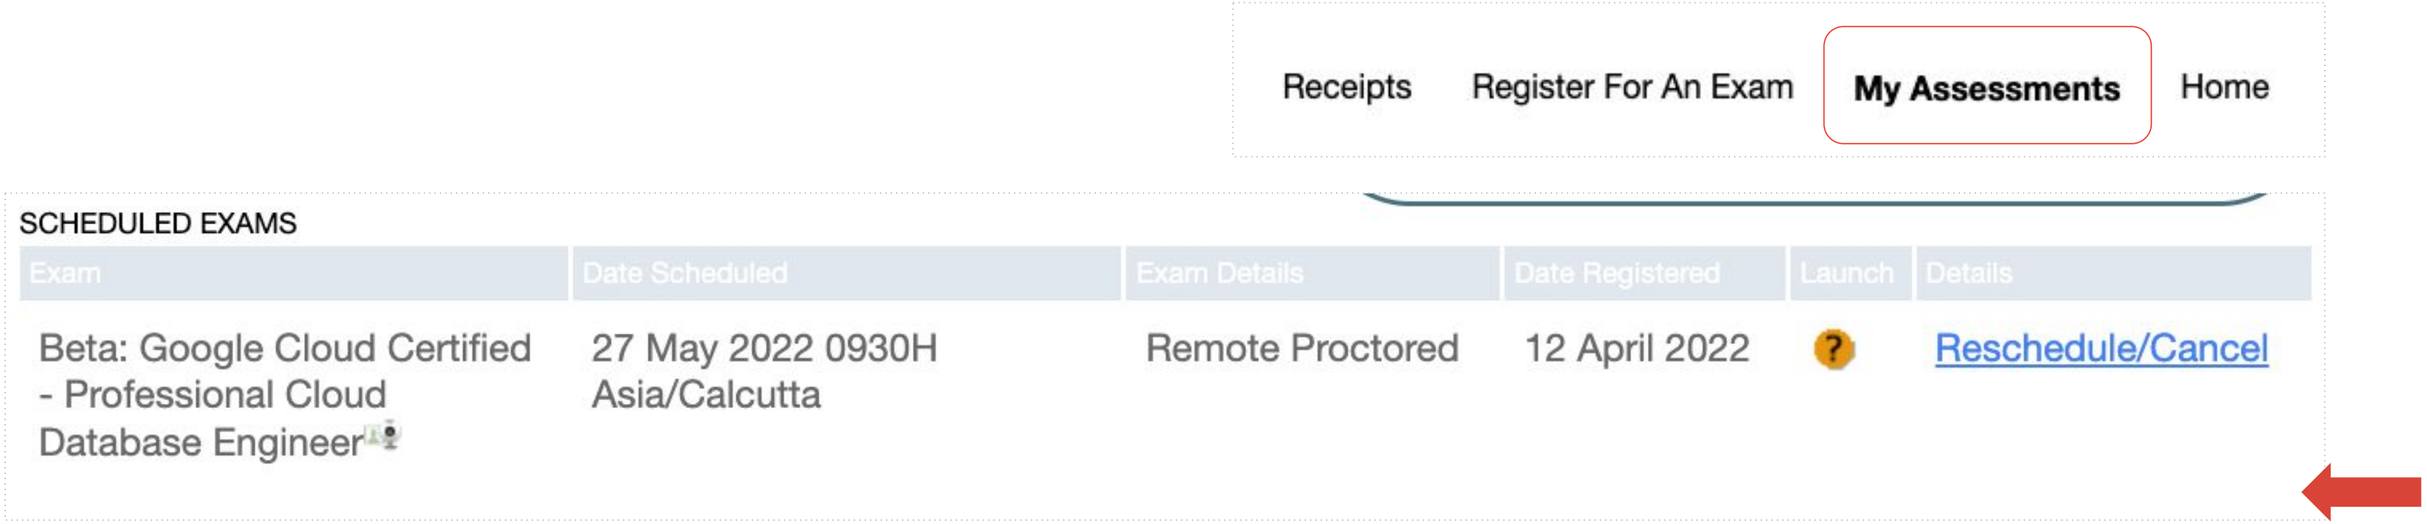
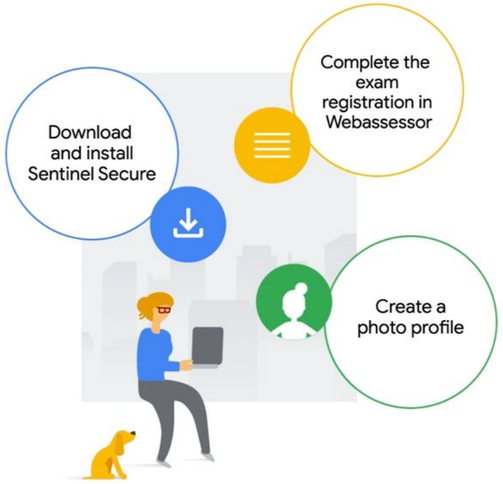
Rescheduling

- There's a rescheduling/late fee if you update registrations in less than ...
  - 72 hours for onsite exams scheduled at a testing center.
  - 24 hours for online proctored exams taken remotely.
- It is possible to change from remote to onsite or vice-versa: contact kryterion support.
- Login to the webassessor site. Click "My Assessments" to see your current exam registrations. Next to it, there will be a "Reschedule/Cancel".



Setting up New Secure Browser (for remote)

- Exam is delivered via a software controlled by kryterion proctors.
- Days before the exam, setup the “New Secure Browser” software on your computer by following steps on the webassessor site.
- Setup your biometrics profile.
- Do not wait till the last moment for this - you will increase your stress/anxiety just before the exam.
- Ref: https://kryterion.my.site.com/support/s/article/Launching-your-Online-exam?language=en_US



For Online Proctored Exams

Before you can launch your exam, you must complete the following steps:

Step 1 **Install NEW Secure Browser**

If you have not installed the **latest** secure browser (as of May 16, 2022) or you are unsure, click the button above, then run and install the program.

Step 2

Create your Biometric Profile - If you have not completed your Biometric Enrollment, a button will appear above. You must complete the Biometric Profile prior to taking an OLP test.

Types of Questions

- Only multiple choice questions.
- No Lab.
- No case studies.

You are a project owner and need your co-worker to deploy a new version of your application to App Engine. You want to follow Google's recommended practices. Which IAM roles should you grant your co-worker?

- ○ A. Project Editor
- ○ B. App Engine Service Admin
- ○ C. App Engine Deployer
- ○ D. App Engine Code Viewer

multiple-choice

Your company has a mission-critical application that serves users globally. You need to select a transactional, relational data storage system for this application. Which two products should you choose?

- ☐ A. BigQuery
- ☐ B. Cloud SQL
- ☐ C. Cloud Spanner
- ☐ D. Cloud Bigtable

Evaluating Options

- Read the question stem carefully. Understand exactly what the question is asking.
- Try to anticipate the correct answer before looking at the options.
- There is only one correct answer for multiple-choice; or as many as indicated for multiple select. If you find two seemingly correct answers, read the question and options again.
- When you have multiple valid answers: the best answer uses common sense; it is the choice of knowledgeable and experienced individuals; and, it best fits the question.
- Take questions at face value. If certain details are omitted, then they are unlikely to contribute to the selection of the best answer.
- Pay attention to qualifiers ("usually", "all", "never", "none") and key words ("the best", "the least", "except", “recommended”).
- If you have to guess, eliminate the obviously false choices first.
- There is no penalty for guessing, so do not leave questions unanswered.
